To know more about audaxes, please visit our website: https://audaxes.de/

Job Description:

- Provide consulting services to clients in designing and optimizing supply chain & logistic processes
- Advise clients on the functional and technical implementation of SAP products (SAP EWM, SAP TM, SAP SD, SAP ABAP)
- Participate in project planning, design, and execution
- Provide operational project support in all phases of implementation, from design and realization to testing, training, and GoLive support
- Ensure the quality of externally managed implementation projects
- Guide and advise clients in project pre-phases for project preparation and planning
- Enhance service knowledge and portfolio through new functional and technical contents and service offerings
- Support the sales colleagues in license and service-related customer workshops, proposal processes, product demonstrations, and proof-of-concepts
- Collaborate with the product development team, such as in co-innovation projects

Your Profile:

- Currently studying a degree in Informatics, Business Informatics, Computer Science, Business Administration, or any other related disciplines (Applicants without a relevant degree but have basic SAP knowledge / experience will also be considered)
- Interested in business process automation (particularly supply chain)
- Willing to learn and stay up-to-date; have a hands-on mentality
- Have a strong analytical mind and high self-motivation
- Have professional proficiency in English and working proficiency in German

Preferred Skills / Knowledge:

- Knowledge in supply chain management (e.g., Warehouse Logistics, Material Flow Optimization, Transportation Management, Yard Management)
- Knowledge in SAP products, esp. Transportation Management (TM), Extended Warehouse Management (EWM), Sales and Distribution (SD), Materials Management (MM)
- Basic knowledge in programming (e.g., ABAP)

Your Benefits:

- Close guidance on entering the SAP field
- Participation in challenging projects with well-known international corporations as well as hidden champions
- A flat and modern organizational structure which allows you to thrive
- Flexible working hours and possible home office
- Opportunities for professional growth and attractive remuneration package
- Possible long-term, full-time employment after successful training
